Businesses are having a headache with hundreds of orders coming from many different sources such as dozens of Landingpages, dozens of different websites. Unable to manage order input from marketing and sales staff or simply manage on Excel, it is easy to lose data.

Meanwhile, it is not possible to manage the amount of money that employees have used on a daily basis to run ads. It is very difficult for company leaders to track the number of orders and corresponding to the amount of advertising spent, it is very difficult to come up with a new strategy to monitor daily, weekly, monthly and yearly

WINAD will be the optimal solution to these dilemmas, helping businesses operate efficiently

The only software in Vietnam
